

BERIAS

The 30-Day Clarity Sprint

Operational Clarity & Process Automation for Miami's Fast-Moving Firms

The Miami Reality Check

Great Clients. Growing Sales.

Focused on growth. Driven by relationships.
Delivering value.

Broken Middle.

Bottlenecks. Manual
workarounds. Hidden costs.

Most firms have great lawyers or products, but the machinery behind them is stalling.
Manual sorting, missed follow-ups, and 'lost' billable hours are eating margins.

The Cost of the “Frankenstein” Tech Stack

**10+ Hours
Lost Daily**

Teams act as manual data-entry robots, re-typing data from one screen to another because tools don't talk.

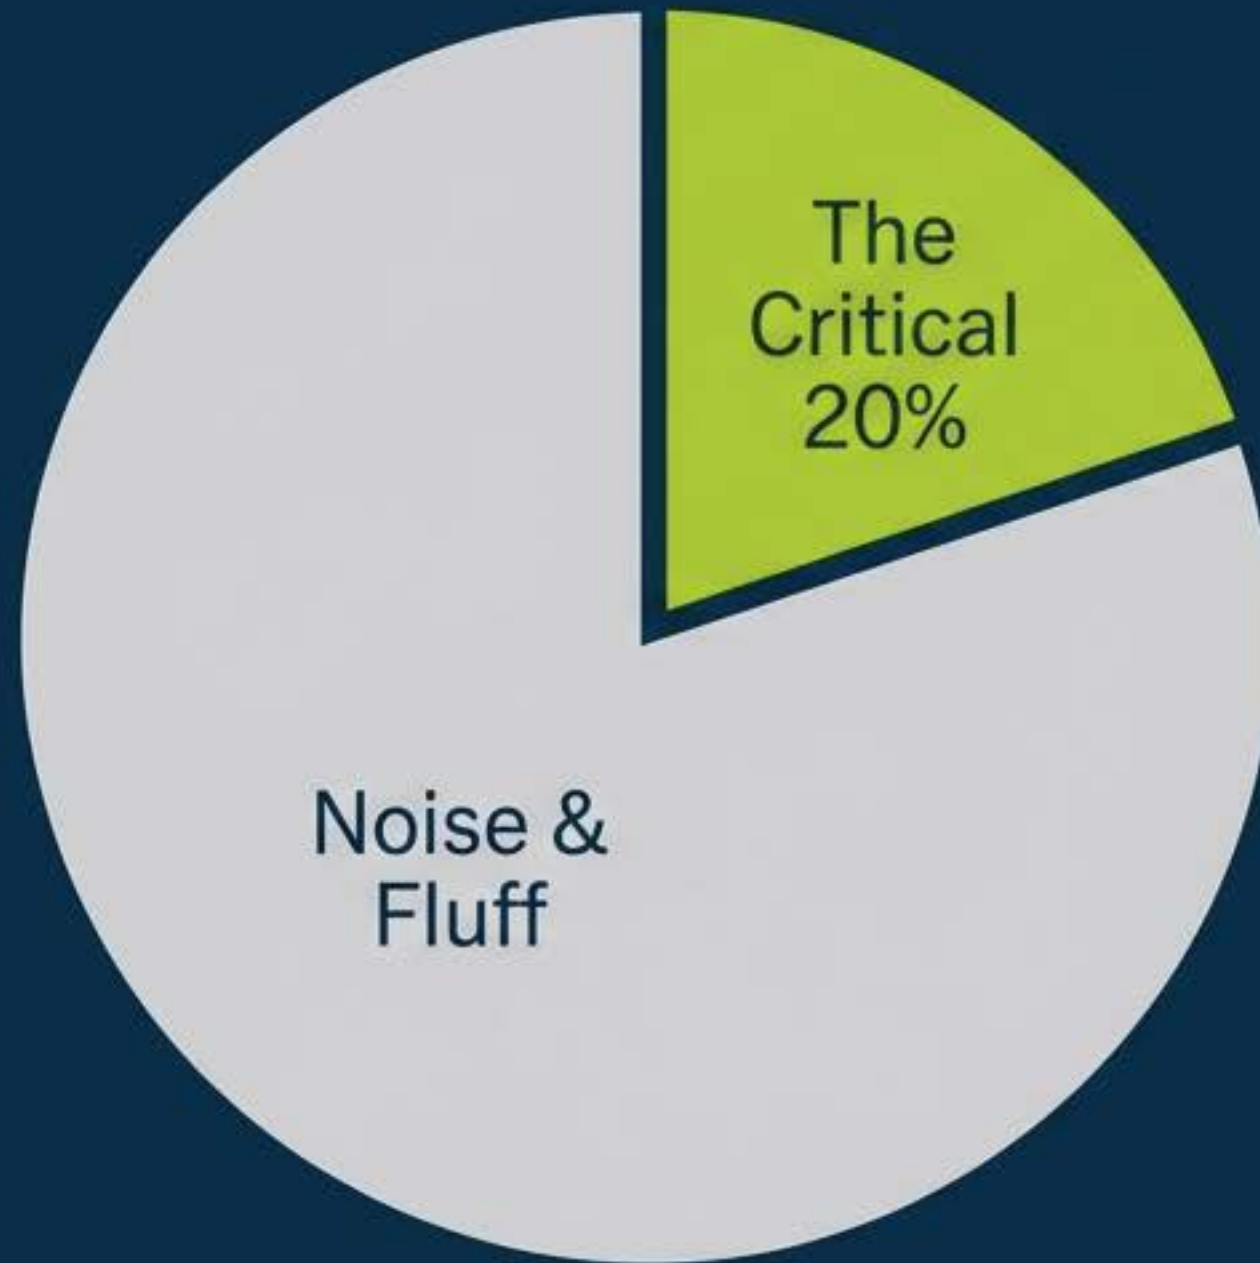

The Hidden Factory of Waste.

Stop Guessing. Start Sprinting.

The 30-Day Clarity Sprint is not “coaching.” It is a tactical overhaul.
We build the systems so you can build the business.

The Power of Adaptive Micro Consulting

The 80/20 Rule:
We identify the 20% of broken processes causing 80% of your headaches.

Modular. Fast. Flexible. No long-term contracts.

Clarity vs. Traditional Consulting

	Traditional Consulting	BERIAS Sprint
Duration	Months or Years	30 Days (Fixed)
Cost	Hourly Fees + Retainers	Fixed Project Fee
Output	Heavy PowerPoint Decks	Actionable Playbooks
Focus	Long-term Theory	Immediate Implementation

The 30-Day Roadmap

Week 1	Week 2	Week 3	Week 4
			
Diagnosis & Kick-off	The 'Messy' Middle (Mapping)	Leverage Analysis (80/20)	The Playbook & Handover

Modular. Fast. Flexible. No long-term contracts.

Weeks 1 & 2: The Deep Dive

- **The Digital Questionnaire**
Rapid data gathering to understand goals before we meet.
- **The Gap Analysis**
Identifying exactly where cases, orders, or data get stuck.
- **Visualizing the Chaos**
We map your current workflow 'warts and all' to make invisible bottlenecks visible.

Weeks 3 & 4: Your Operations Playbook

A comprehensive 15-25 page guide to rolling out efficiency.

Use Case: The 'Automated Mailroom' for Law Firms

Paralegals spend
5 mins/file sorting
hundreds of court docs.

AI Processing

38 hours saved/month.
First-year net savings:
~\$8,750.

AI reads filings ->
Identifies Case #
-> Auto-files in
Filevine/Clio.

Use Case: Route Optimization for Logistics

Inefficient Route

Optimized Route

Context:

SpeedyFreight: 8 trucks, manual dispatch, missed windows.

Fix:

Standardized dispatch workflow + route optimization tool.

Result:

10-15% reduction in fuel costs.

Eliminated 'Where is my driver?' calls.

The ROI of Clarity

The system pays for itself in the first 90 days.
After that, it's pure margin.
